

Dear Dor, Noy, and MyndYou team,

I am writing to express my interest in the Product Manager position at MyndYou.

As a Technical Product Manager at Hyro AI, I led the development of patient-facing, HIPAA-compliant B2B conversational AI solutions for enterprise healthcare organizations. I managed the entire product lifecycle from ideation to deployment and worked with the larger product team on building and prioritizing roadmap items.

Leveraging my passion for NLP and AI to optimize patient experiences and achieve significant automation rates in value-based healthcare tasks. My hands-on experience as a Software Engineer helped me to efficiently communicate with R&D and understand technical and architectural concepts to better define and align product requirements.

In this role, I learned to collaborate cross-functionally with R&D, sales, marketing, solutions, and customer success teams, and served as a subject matter expert on healthcare and human-computer interaction. I like to focus on enhancing end-user experience through data-driven analyses and collaboration with UX designers while keeping customers' goals and ROI in mind and maintaining good relationships with them.

I am excited about the opportunity to apply my combination of product management, research, and technical backgrounds to develop innovative, user-centric AI-driven healthcare solutions at MyndYou and contribute to the company's mission.

Thank you for considering my application. I look forward to further discussing MyndYou's future directions and vision.

Sincerely,

Eran
